

Mill Park Heights Primary School

– Environmental Bollards

The TLfS Project was carried out by the Junior School Council (JSC) at Mill Park Heights Primary School. They were given \$500 by the School Council to help them with their project. After two mornings of training from Pat Armstrong, the JSC followed a number of steps to complete their project, including:

- Consulted with classmates to decide on the top 5 ideas (within budget),
- Presented the proposal to School Council to gain approval.
- Decided on the project i.e. to build environmental bollards within the school grounds
- Created posters for the environmental bollard design competition
- Presented the design competition winners at the school assembly
- Purchased paint and requested materials from school community
- Painted the bollards
- Organised placement of bollards and with help from the school groundsperson.
