

# Reuse & Recycle

This term our class and 9Red every Wednesday have been working on a community project which is where we go into groups and work on a project based around a theme and it was "*sustainability*". Aymee and I formed a group and we decided to do our project on reusing old paper and making it into new paper. We achieved this project with help from our parents, Mrs. Wyeth, Mrs. Op De Coul, Mrs. Deayton, Dalhsens, and the Horsham plazas management.

The first couple of weeks we collected utensils, paper, and information, once this was complete we soaked our paper and Mrs. Wyeth helped us make our first batch and then we did the rest. Some of the things we made included paper, bookmarks, envelopes, and plant-a-cards (which are cards that have seeds in them and after you have used them as a bookmark you can plant them in the ground and hopefully they will grow).

Once we thought we had enough paper we made a price list and some posters and walked down to the Horsham Plaza and asked if we could sell our paper the following week on Tuesday night, all day Wednesday and all day Friday. They said yes. Our profit from selling our paper was \$43.00 but we had to take some money away for the ribbon, wrapping paper and seeds we brought. Our total money raised was \$ 35.00. This money will go to the Horsham Golf Club to help rebuild it after the fires that destroyed it.

Some problems Aymee and I had were we ran out of paper and had to take some out of the packs of paper and envelopes, didn't sell all our things, and we kept doing things wrong. We thought this project was a good idea and would love to do it again.
